SPECTONA
ELEGANT SURFACES

A woman with long brown hair, wearing a long-sleeved, floor-length red dress and silver high-heeled sandals, is walking from left to right. She is positioned in front of a series of vertical stone pillars. The pillars have different textures and colors: the first is a dark brown with a grid pattern, the second is a light tan with natural stone veining, the third is a greyish-blue with a mottled texture, and the fourth is a light tan with natural stone veining. The background is a plain, light grey wall and floor. A red triangle points downwards towards the text on the right.

FEATURE

Water Proof

Resistant To Scratches

Resistant To High Temperatures

Easy To Clean

Resistant To Bending

Resistant To UV Rays

The parameter used for slip resistance is called the Coefficient of Friction (COF). The higher the COF, the better the slip resistance of the tiles. Unglazed tiles, mosaic tiles (with many grout joints) and rough surfaced tiles are less slippery when compared with smooth tiles.
