9MM THICKNESS

The thickness of tiles is an essential consideration for various applications. Thicker tiles generally offer more durability and can withstand heavy foot traffic.

They are often preferred for outdoor spaces and high-traffic areas. On the other hand, thinner tiles are suitable for wall applications, and may be easier to handle during installation.

GLOSSY
SERIES

Glossy finish tiles boast a striking mirror-like sheen that reflects light throughout the space, creating a sense of openness and brightness.

LUMINOUS
journeys

Product Presentation

GLOSSY
SERIES

Glossy finish tiles feature a striking mirror-like sheen that reflects light across the entire space, creating a sense of openness and brightness.

This reflective quality makes rooms feel larger and more inviting. Perfect for smaller areas or rooms with minimal natural light, glossy floor tiles are an ideal solution to enhance any interior.

Size:
600×1200MM

Finish:
GLOSSY

A large orange Hitachi excavator is shown in a quarry, lifting a massive, light-colored stone block with its bucket. The block is being loaded onto the flatbed of a white truck. The truck is already carrying several other similar stone blocks. The background features a steep, rocky hillside with patches of snow under a clear blue sky. The scene is set in a rugged, industrial environment.

GLOSSY
SERIES

Enhanced with a **Glossy Finish**

Through our technologies, we mimic the natural randomness and allure of handmade objects.

Each tile is uniquely distinct. The glossy surface amplifies the random distribution of natural elements.

APPLICATION

Greet a complete home solution product rangewith us. One of the most popular practices for modern-day homes is to extend the flooring of the Living room to the kitchen.

A well designed Glossy finish tiles that will perfectly complement your trendy space.

FEATURE

-  Water Proof
-  Resistant To Scratches
-  Resistant To High Temper Atures
-  Easy To Clean
-  Resistant To Bending
-  Resistant To UV Rays

The parameter used for slip resistance is called the Coefficient of Friction (COF). The higher the COF, the better the slip resistance of the tiles.

Unglazed tiles, mosaic tiles (with many grout joints) and rough surfaced tiles are less slippery when compared with smooth and HIGH GLOSSY glazed tiles.
